Lecturers Biographies

Prof. Michel Bierlaire

Prof. Michel Bierlaire holds a PhD in Mathematical Sciences. He is associate professor in the School of Architecture, Civil and Environmental Engineering at EPFL, where he became the director of the Transport and Mobility laboratory. Since 2009, he is the director of TraCE, the Transportation Center at EPFL.

His main expertise is in the design, development and applications of models and algorithms for the design, analysis and management of transportation systems. Namely, he has been active in demand modeling (discrete choice models, estimation of origin-destination matrices) and Dynamic Traffic Management Systems.

Prof. Maya Abou Zeid

Prof. Maya Abou Zeid holds a PhD in Transportation. She is an Assistant Professor of Civil and Environmental Engineering at the American University of Beirut and a research affiliate of the Intelligent Transportation Systems Program at the Massachusetts Institute of Technology. Her main expertise is in the areas of travel behavior modeling and forecasting, market research, and traffic flow modeling and simulation.
